

Ninth Wave Connect

Purpose Built Data Sharing

The Leading Open Finance Solution
for Financial Institutions

Market Demands

The rise of Fintech has created a world that demands interoperability, security and simplicity in financial management. Financial Institutions must take an active role in supporting their customers' demands within this broad and complex ecosystem of apps/software requiring financial data to function.

Ninth Wave Connect is an enterprise solution for FIs that allows consumer and business customers to securely and reliably share financial data with 3rd party applications.
